### EDUCATION

#### Muhlenberg College

Allentown, PA

Bachelor of Arts, Double Major in Computer Science and Finance

May 2027

- GPA: 3.6
- Relevant Courses: Business Management, Data Structures and Algorithms, Software Engineering, Corporation Finance, Database Systems, Cybersecurity, Web-Software Development, Computer Organization, Computer Science II, Statistical Analysis, Financial Accounting, Math For Financial Analysis, Current Topics in Financial Markets: Investment Strategies, Game Programming

### INTERCOLLEGIATE ATHLETICS

#### Muhlenberg College Wrestling

Allentown, PA

NCAA Division 3 Scholar Athlete & Team Captain

May 2023-May 2027

- Top 10-ranked college wrestler in the country, 2025 NCAA Qualifier, 2x NWCA Scholar All-American, 2024 Team MVP

### RELEVANT EXPERIENCE

#### Noteefy

Remote

Software Engineering Intern

June 2025 - Present

- Developed and enhanced Noteefy's Waitlist and Confirm features - core tools in their automated tee-time demand and notification platform used by over 800 golf courses and thousands of players worldwide.
- Built and integrated new functionality using a React frontend connected to a Python/JavaScript backend with MongoDB and Docker.
- Onboarded 100+ golf courses, reducing engineering onboarding time by an average of 1.5 hours per course ( $\approx$  150+ hours saved) and generating over \$1.3 million in revenue by collaborating closely with Sales and Customer Success.
- Partnered with the Sales team to rapidly prepare courses for launch, accelerating revenue generation and reducing time-to-market for new clients.
- Diagnosed and resolved client-reported issues through cross-functional collaboration with Customer Success, translating real-world feedback into production-ready fixes.
- Wrote efficient and error-handled code adhering to industry best practices, improving long-term scalability and reducing maintenance costs.
- Used Postman to design, test, and debug APIs, ensuring smooth data flow between the UI and backend services.

#### Finsiders

Remote

Digital Platforms Intern

March 2024 - May 2024

- Developed and relaunched Finsiders.org, a nonprofit platform connecting banking, design, and technology professionals for collaboration, networking, and knowledge sharing.
- Led the development process from concept to deployment, overseeing design, functionality, and user experience to ensure a seamless and intuitive platform.
- Facilitated team meetings to align project goals, gather feedback, and drive continuous improvements.

#### Muhlenberg Student Managed Investment Fund,

Allentown, PA

Quantitative Researcher

September 2023 - Present

- Contributed as a key member of a 34-person quantitative team, generating a 27% return in 2022 and a 25% return in 2023 to date, with a cumulative \$418,000 in total P&L over three years from an initial \$600,000 capital base in 2022.
- Designed and implemented forecasting models, analytical programs, and data pipelines to support data-driven trading decisions.
- Engaged in weekly lectures covering advanced topics such as Bayesian statistics, forecasting, machine learning, deep learning, option pricing, and mean reversion, enhancing quantitative and trading expertise.

### INDIVIDUAL PROJECTS

#### LeakGuard — Subscription Leak Detector | <https://github.com/aloniewski2/subscription-saver>

February 2026

- Built a privacy-first web app that analyzes bank statements locally in-browser to detect recurring charges, duplicate services, zombie subscriptions, and hidden price increases
- Engineered a detection engine with 150+ merchant patterns, fuzzy matching, and recurrence heuristics to classify subscriptions, bills, and variable spending
- Designed a gamified "Efficiency Score" (0-100) and insights dashboard surfacing actionable intelligence: trial traps, micro-leaks, cancellation difficulty ratings, and duplicate service alerts
- Tech stack: React, TypeScript, Tailwind CSS, Framer Motion, Recharts, PapaParse — zero backend, 100% client-side processing

#### SolveIt AI | <https://github.com/aloniewski2/solveit-ai-v1>

October 2025

- Developed a full-stack AI problem-solving application using React + TypeScript frontend with Supabase Edge Functions (Deno) backend.
- Integrated Google Gemini AI for multimodal analysis—processing both images and text to diagnose real-world problems with confidence scoring.
- Implemented real-time web crawling via Firecrawl API to fetch verified tutorials, forums, and repair guides from Reddit, YouTube, iFixit, and StackExchange
- Built an intelligent follow-up question system that dynamically generates clarifying questions when the initial input is vague or low-confidence
- Created an AI-powered chatbot for contextual follow-up conversations about diagnosed problems using streaming responses
- Implemented native mobile features using Capacitor—camera integration, geolocation-based professional finder, and cross-platform iOS/Android deployment.

#### DineValley | <https://dinevalley-frontend.onrender.com/>

November 2025

- Developed a modern restaurant recommendation web application using a React + TypeScript frontend and a Node.js/Express backend.
- Integrated Google Places API to deliver real-time restaurant search, filters, and geolocation-based recommendations.
- Designed a clean, responsive UI with Tailwind CSS and Vite, featuring dynamic components, state management, and reusable sections.
- Implemented custom filtering logic for distance, cuisine type, ratings, pricing, and user-selected preferences.
- Built backend endpoints to handle requests, manage API keys safely, and preprocess restaurant data for improved accuracy and speed.
- Enhanced UX with a chatbot interface that leverages the same filtering logic to deliver personalized restaurant suggestions.
- Set up CI/CD workflows with GitHub Actions for automated testing and deployment.

### TECHNICAL SKILLS

**Languages:** Java, Python, R, SQL, JavaScript, HTML, CSS, JSON

**Frameworks & Libraries:** React, Node.js, Express.js, Flask, FastAPI, Dash, Pandas, NumPy, Matplotlib, Plotly, scikit-learn, Pygame, yfinance,

**Tools & Platforms:** Postman, Docker, Git/GitHub, WIX, Excel, PowerPoint, Microsoft Azure, Figma, MongoDB, MySQL, R Studio,
